

## COMP4050 Week 7 Meeting notes

- Team members began the meeting by completing 360 feedback.
- Josh and Tony tested out demonstrating our SwapStreet application's functionality
- Team members worked on their respective slides in preparation for a mock presentation.
- We have agreed to meet over the break during the regular class time of Tuesdays at 2pm

### Notes on other teams:

- Separating 'create new job' into:
  - I need a favour
  - I can offer a favour
- Leaving a review on another user's profile.
- Request a job directly from another user based on their skills.
- Job type in schema? Might make search bar more useful as it currently relies on the exact name. Maybe a category system will be better.

### Feedback:

- We surprised Kate by going week by week
- Make sure phones are on silent
- Make sure dogs are silent
- Test equipment prior to presentation
- Have to figure out a way how to transition between speakers.
  - Something on the slide
  - A hidden signal to team members
  - Make the transition seamless
  - Have one speaker per slide, with the slide labelled with the speaker's name.
